

# World Talent Games

Where Amazing Plays™

## Exec Bio

Mr. Stephen Owst is a founding partner and serves as a Director and The Chief Technology Officer of Talent Games Inc. ("TGI"), headquartered in Vancouver, BC.

The entrepreneurial spirit and technology expertise that Mr Owst adds to the Talent Games management team is backed by over 30 years in the industry. Educated in Aerospace Engineering in the Royal Air Force, he takes his well-rounded scope of experience and education to a new level by guiding the company's day to day operations and technical development.

His engineering journey started in the Royal Air Force where he was responsible for the service and repair of many of the UK's most advanced radar systems. From there he moved to the Middle East where he was one of the managers responsible for the computer systems at Abu Dhabi's brand new airport ADNIA. Returning to the UK he continued his hi-tech work with British Airways where he was a part of the team responsible for all British Airways computer systems at Gatwick Airport, and lastly in the UK with Intergraph who were at the time the world's leader in CAD / CAM Systems. Mr. Owst then permanently relocated to Canada in August 1990.

His journey continued in Canada where he held several positions at ascom Timeplex who at the time were one of the world leaders in multiplexers, in his time here he was strategic in the design and implementation of the first BcTel ADSL network which utilized an ascom Timeplex infrastructure.

It was at ascom Timeplex that he made the move into sales and finally into sales and marketing management. During his time with ascom Timeplex he specialized in a unique form of Frame Relay where he was personally responsible for designing seven of the top ten credit union networks in BC and Alberta. Mr. Owst was also tasked by the company to train all new engineers at the company's facilities in Florida and New York on this advanced technology and implementations into customer networks.

Since that time Mr. Owst has gone on to hold several senior management positions in the high-technology sector with companies such as TELUS and Nokia. His leadership roles were well served by his keen technical background, his understanding of the sales process, and his reputation for building lasting business relationships. Specifically, at TELUS, he was integral in building a coast-to-coast sales team of over one hundred individuals that successfully participated in the launch of TELUS TV in Canada.

His success continued in private companies such as Alternet Systems, Qeyos AD Systems and more recently Qwick Media where he served in various leadership capacities such as operations management, sales, marketing, and technology.

He balances his high-tech interests with a talent for the visual in his successful professional photography venture now entering its second decade. This outlet drives his passion for people, nature and world travel, as well as the artistic expressions that add value to Talent Games' mission to: "Unify World Talent".

As Chief Technology Officer, he provides the management and direction of all Technology related areas while also functioning as an integral part of the Executive Management team. Using an active and practical approach, Steve directs all employees in R&D and IT to attain the company's strategic goal as established in the company's action plan, thus ensuring the growth of the company through most effective use of technological resources.

He is also the leader on all media initiatives, negotiating and managing related technology services. His strategic support and involvement in the day-to-day operations is critical. His ability to leverage professional relationships to further the partnership process will elevate the success of World Talent Games.
